Subject: Summary for comp time tracking purposes

Hi Phil,

On Friday, I was asked to provide technical support in response to the Gold King mine release in Colorado. In particular, I was asked to find out what WQS apply to the Animas River in New Mexico, and to identify what past 303d listings exist in the river. In response, I shared the designated uses and criteria applicable to the two Animas River segments, as well as 303d listing information. I also began familiarizing myself with information available in Storet/WQX for NMED stations on the Animas (started with examining past data on hardness, since hardness is necessary for calculating the metals criteria).

On Friday afternoon, David Garcia asked me to check in with Angela Restivo to see if she would need me to be on-call over the weekend. I followed up with Angela who indicated it could be helpful and recommended that I estimate 2 hours for Friday and 4 hours each for Saturday and Sunday. Maria Martinez helped me to fill out the necessary comp time form. And, since I have a flexiplace agreement already in place, HR recommended that I simply update you via email on the dates/time when I've worked during the off hours.

To the above end and for tracking purposes, here's a summary of the time I've worked so far (not very much yet).

Friday, 8/7

- Received a call from Angela at 7:25 pm requesting the applicable NM water quality criteria. I pointed her to my email from earlier on Friday. Total call time: 5 mins.

Saturday, 8/8

- I logged in to check email to see if anything was needed from me, at which point I noticed and read two emails received that were related to the event. Total time spent: 10 mins.

- At 1 pm, I logged onto an EPA/NMED conference call (I was identified as a required attendee on the invite). A question about water quality criteria arose during the call, to which Philip Turner (I believe) responded. Total call time: 30 mins.

- After the call, I prepared this summary message. Total time spent: 20 mins.

I will keep you posted on any other times that I work between now and Sunday evening.

Thanks,

Melinda
